Preface

The Pueblo Farming Project, or PFP, is an ongoing collaboration between the Hopi tribe and the Crow Canyon Archaeological Center. The PFP examines traditional Pueblo Indian farming techniques to help us understand ancient farming in the Mesa Verde region of southwestern Colorado. The project conducts research, develops educational programs, and pursues Hopi interests in corn and corn farming as an essential element of their culture. This e-book presents the methods and results from the Pueblo Farming Project, as well as a set of lesson plans developed for middle school students to learn about Hopi agriculture.

1

Introduction

1.1 What was the PFP?

History

Research goals

Hopi interests

Educational products

Highlight MSTFP

1.2 Who were the participants?

1.3 Where did it take place?

1.4 When did it take place?

1.5 Who funded the PFP?

2

The Story of Maize

2.1 Origins

2.2 The people of corn

2.3 A world of corn

3

The life-cycle of maize

4

What maize needs to flourish

4.1 Soil

4.2 Water

4.3 Heat and sunlight

GDD sidebar

5

The PFP Field Experiments

5.1 Procedure

5.2 The PFP environment

Soils in the gardens

5.2.1 Cortez weather and CCAC weather stations

5.2.1.1 Precipitation

5.2.1.2 Temperature

5.2.1.3 GDD

5.3 Results

Maize growth analysis

Maize production

5.3.0.1 Ear diversity

5.3.0.2 Yields through time

Maize genetics

6

What we learned

6.1 The resilience of Hopi corn

6.2 Improving our understanding of Mesa Verde history

6.3 Culture matters!

7

Lesson plans for educators

7.1 The People of Corn

7.2 Farming Through Drought

7.3 Know Your Soil

7.4 Ancient Technologies

7.5 The Short Blue Ear

Open Review

Open Review means that you can freely read the book and easily help to make it better. You can offer suggestions by make annotations using hypothes.is¹, an open source annotation system. This is a very simple system for interacting with the book. If you are familiar with GitHub or Git, you can also comment using GitHub's issue tracker² for the book, or make a pull request. In addition to these feedback options, this website for the book will be collecting your implicit feedback by tracking the readership and abandonment rate of each section of the book.

Open Review takes place before and at the same time as the book publisher's peer review. The feedback from Open Review and peer review will be used to create a revised manuscript. The Open Review period will end when the final manuscript is submitted to the publisher.

The concept of Open Review, as it is implemented here, is taken from Matthew Salganik's³ Open Review Toolkit⁴. Much of the text on this page comes from the Open Review Toolkit About page⁵ and the Open Review Toolkit Privacy and Consent page⁶

FAQ about open review

What kind of feedback are you looking for?

Open Review is not just about catching typos. Rather, Open Review is designed to collect all types of feedback, and I'd particularly welcome any feedback that you have about the substance of the book. Are there sections that you find particularly confusing? Are there points that you find particularly important? Am I making claims that you think need to be refined? Are there parts of the book that you think should be removed? When in doubt, I think you should follow one of the main principles at Wikipedia: Be bold⁷.

Can I see the annotations that others are making?

Yes, all the annotations are public. You can see them on right hand side of the each page or you can read them in stream form⁸.

What are the benefits for readers?

You get to read the manuscript and help make it better.

What are the benefits for authors and publishers?

The Open Review process will benefit both authors and publishers, even if they have no interest in increasing access to knowledge. The process will lead to higher manuscript quality through the explicit and implicit feedback. Further, the Open Review process will provide valuable data that can be used during that marketing of the book.

⁸<https://hypothes.is/stream?q=benmarwick-bookdown-ort>

Has anyone ever done something like this before?

This is based on Matthew Salganik's⁹ Open Review Toolkit¹⁰. He's written about some related efforts here: <http://www.bitbybitbook.com/en/open-review/>

What kind of information are you collecting and how will that information be used?

Please read our privacy and consent policy, below.

How I can learn more about traditional peer review of academic books?

The AAUP recently published a report¹¹ on best practices for peer review.

Can I do this with my book?

Sure. Check out the code for this website at <https://github.com/benmarwick/bookdown-ort/> for more about how we did it.

I have a different question about Open Review. How can I get in touch?

Send an email to bmarwick@uw.edu

Overview

On this website, we are making the complete text of the book available at no cost. While you are reading the book, we are measuring reader behavior in aggregate. For example, we are measuring which sections of the book get read most often. This data will help us improve the book. Everything we are doing is common on modern websites. We describe it in more detail below.

What information do we collect?

We use Google Analytics¹² to collect information about how you interact with this website. Further, like most websites, we use cookies¹³ to enhance your experience, gather general visitor information, and track visits to our website. Please refer to the “do we use cookies?” section below for information about cookies and how we use them.

How do we use your information?

Any of the information that we collect may be used for research, to improve the book, and to help sell the book.

How do we protect your information?

We implement a variety of security measures to maintain the safety of the information that you provide us.

Most of the browsing information that we have is stored Google Analytics, and you can read more about their security and privacy principles¹⁴.

¹⁴<https://support.google.com/analytics/answer/6004245?hl=en>

Annotations that you add are managed by hypothes.is¹⁵, and you can read more about their terms of service¹⁶.

Our website is hosted by Github Pages¹⁷, and you can read more about Github's terms of service¹⁸.

Do we use cookies?

Yes. Cookies are small files that a site or its service provider transfers to your computer's hard drive through your web browser (if you allow) that enables the sites or service providers systems to recognize your browser and capture and remember certain information.

In order to offer you a better site experience, we use cookies to understand and save your preferences for future visits and to compile aggregate data about site traffic.

Do we disclose any information to outside parties?

We do not sell, trade, or otherwise transfer to outside parties your personally identifiable information except trusted third parties who assist us in operating our website, conducting research, or providing a service to you, so long as those parties agree to keep this information confidential. We may also release your information when we believe release is appropriate to comply with the law, enforce our site policies, or protect ours or others' rights, property, or safety.

Third party links

Occasionally, at our discretion, we may include links to third party websites. These third party sites have separate and independent privacy policies. We, therefore, have no responsibility or liability for the content and

activities of these linked sites. Nonetheless, we seek to protect the integrity of our site and welcome any feedback about these sites.

Website hosting

Our website is hosted by Github Pages, and you can read more about Github's terms of service.

Your consent

By using our site, you consent to our privacy policy.

Questions

If you have any questions, please send us an email
kbocinsky@crowcanyon.org

Changes to our Privacy and Consent Policy

We reserve the right to change our privacy policy from time to time at our sole discretion. Please periodically check this section to review the current version of the Privacy and Consent Policy. All our previous policies are presented below, and we will continue to update this page if any changes are needed.
